

# **De Pretto Industrie**

## Company presentation

### **1885: SILVIO DE PRETTO S.p.A.**

Silvio De Pretto establishes a Foundry initially repairing looms but soon after begins producing Hydraulic Turbines and Paper Machines .

### **1920: DE PRETTO-ESCHER WYSS S.p.A.**

The company merges with Escher Wyss of Zurich and further consolidates its production in the hydraulic turbine, paper machinery and thermal turbomachinery fields.

### **1969: DE PRETTO-ESCHER WYSS S.r.l.**

Escher Wyss merges with the Swiss Sulzer Group of Winterthur, bringing considerable technological development and research.

### **2001: MAN Turbomacchine De Pretto S.r.l.**

GHH BORSIG acquires Sulzer Turbo creating a new group: MAN Turbo

### **2010: DE PRETTO INDUSTRIE S.r.l.**

In July the holding SELINK, based in Velo d'Astico (VI, Italy) controlling FOC Ciscato, has started the takeover of De Pretto Industrie S.r.l. The acquisition has been completed in April 2012.

## **1. Turbomachinery Engineering & Manufacturing**

Engineering and manufacturing of stator parts and turbomachinery casings. The scope of work also includes the project management, the assembly and packaging of turbocompressors and steam turbines.

## **2. Service**

Services are mainly provided to customers in Italy. The Company has service level agreements and maintenance for many customers in the energy sector, paper manufacturing and steel manufacturing plants.

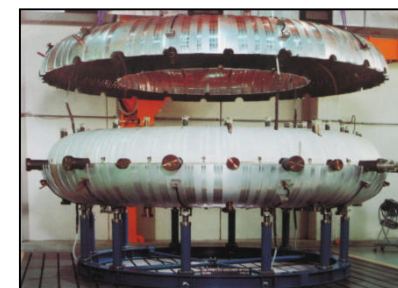

## **3. Special Projects**

Special Projects manufactures components for various sectors like power generation, off shore installations, mechanical applications and research sector (with a remarkable reference list). In all this areas the Company is especially able to benefit from its strong capabilities in the field of welding and precision machining acquired during its involvement in the engineering and manufacturing of components in various fields applications, including i.e. hydraulic turbines, gearboxes, wind energy applications, telescopes and vacuum vessels.

# >> PRODUCTS COMPETENCES MATRIX

De Pretto Industrie

## Products

**Compressors and  
Steam Turbines**

**Packaging**

**Service**

**Special Projects**

## Core Parts

**Welded Constructions**

**Machined Parts**

**Assembled Units**

## Core Competences

**Project-  
Management**

**Engineering**

**Fabrication &  
Welding**

**Machining**

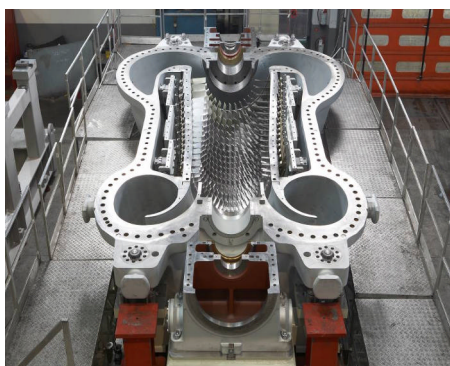

**Assembly**

**Packaging**

Pag. 4

## Compressors and steam turbines for different applications

### Compressors

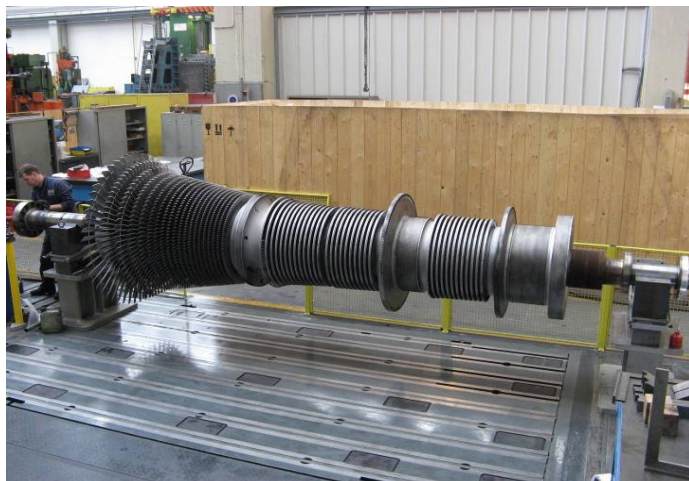

- Axial compressors
- Centrifugal compressors
- Isotherm compressors

### Steam Turbines

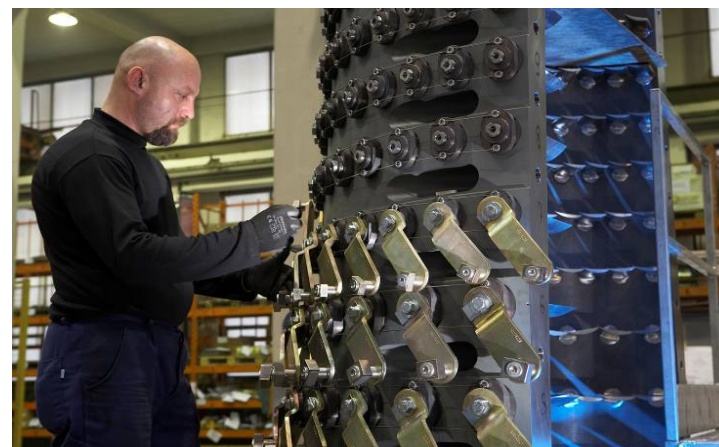

- Condensing turbines
- Backpressure turbines
- Extraction-type turbines
- Turbines with central admissions

## After sale service

### Range of services:

- Service during Product Lifetime Cycle
- Engineering
- Upgrades
- Rerates and conditioning
- Repairs
- Spare parts and components
- Technical consulting
- Service contracts

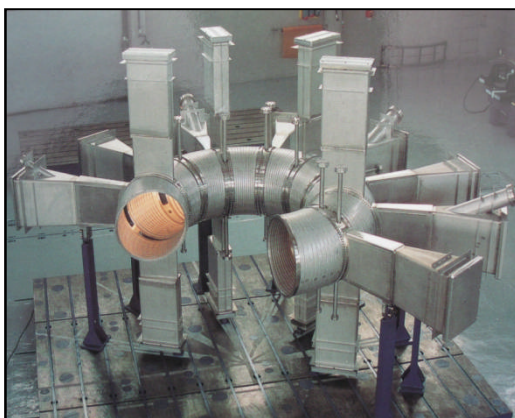

## >> SPECIAL PROJECTS

De Pretto Industrie

**Compressor casings Barrel type**  
(forged, welded and machined)

**Items for offshore installations**  
(forged, welded and machined)

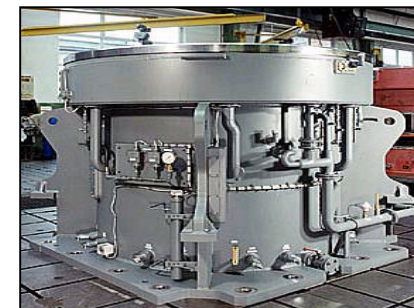

**Francis, Pelton , Kaplan impellers**  
(forged, welded and machined)

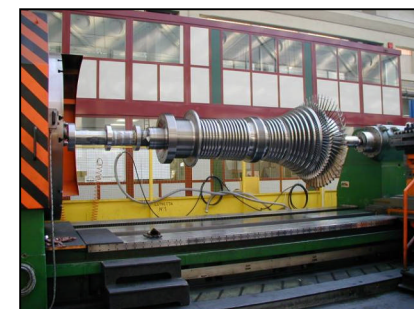

**Welded structures**  
(welded and machined)

**Welded structures**  
(forged, welded and machined)

**Steam turbine and axial compressor rotors**  
(forged, machined and assembled)
